DETAILED ACTION

Drawings

1. The drawings were received on 16 November 2007. These drawings are acceptable.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Tornley (U.S. Patent No. 1,822,550).

Tornley '550, as best seen in Figures 4 through 6 and 10, shows an apparatus for positioning an element in a borehole, the apparatus comprising an upper positioning means (upper element 86) and a lower positioning means (lower element 86), wherein the positioning means are joined by means of a connection (94) having an adjustable length, and wherein the apparatus defines an interior space into which the element is lowered in use.

With regard to claim 9, the method steps recited therein are inherent to the use of the device disclosed by Tornley '550.

Allowable Subject Matter

4. Claims 12 and 13 are allowed.
5. Claims 2 through 8, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Response to Arguments

7. Applicant's arguments, see Remarks, filed 16 November 2007, with respect to claims 1 and 9 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.
